

3. Travel Blanks

One travel blank will be prepared in the laboratory for each day that groundwater samples are collected and shipped to the laboratory. The travel blanks will be prepared in a clean environment and kept in the cooler used to ship samples. The travel blank provides a check for cross-contamination during transport, and will be analyzed for VOCs.

2.3.4 Future Groundwater Monitoring Wells

The Site redevelopment plan is pending and currently unknown. Some existing groundwater monitoring wells may be decommissioned and groundwater monitoring wells may be replaced or added. An addendum to this groundwater monitoring plan will be issued for any changes to this proposed groundwater monitoring program.
